Michael Gullo

Developer / Programmer

I've been programming for 15+ years and am a recent graduate from the Case Western Reserve University Full Stack program (having been a consistent A+ student)... solidifying my skills as a developer/programmer and am now ready to pursue programming as a career.

Not only do I take pride in my coding efficiency and proficiency, I'm always eager to expand my skills into new areas. Solving problems, understanding the code and becoming better at programming has become very addictive.
